AfterRing

The receptionist that answers when yours can't.

HEAR IT NOW

(978) 347-8475

Call it. Try to confuse it.

THE PROBLEM

38%
of calls to small businesses are answered by a person

3 in 4
callers never try again after one unanswered call

6 in 10
call a competitor instead

2024 study of 85 small businesses, as reported by industry sources.

HOW IT WORKS

1. Your phone rings as normal. Calls you answer never touch it.
2. After fifteen seconds unanswered, or after hours, it picks up in your business's name and says the call may be recorded.
3. It takes the caller's details, answers the usual questions from your own information, checks your real calendar and books the visit.
4. Anything it cannot handle goes to you or to voicemail. Never a dead end.

WHAT YOU GET AFTER EVERY CALL

- A two-sentence summary by text or email within a minute.
- The full transcript and recording.
- The visit on your calendar, movable when the customer calls back.
- Every caller logged, and returning callers greeted by name.

BUILT TO PROTECT YOUR NAME

- Never pretends to be a person. Says it is an AI whenever asked.
- Recording notice on every call.
- Only quotes the hours, services and prices you give it. Never guesses.
- Inbound only. It never cold-calls anyone for you.

WHO IT IS FOR

HVAC, plumbing and law firms in Massachusetts: businesses where the caller is urgent and one missed customer costs more than a month of service.

PRICING

$297 /month

Includes 900 minutes of calls, about 10 a day. Beyond that, 20 cents a minute. Billed at the end of the month, every feature included.

A quiet month costs less than a busy one. Month to month.

One-time $425 sign-up fee covers set-up and testing on your existing number. Nothing goes live until you have called it and approved it.

NEXT STEP

Fifteen minutes. You call the demo line as a customer, we show you what lands on the calendar and on your phone. Then you decide.
